PROFESSIONAL SUMMARY

Flutter Developer and Software Engineer with hands-on experience building cross-platform mobile applications using Flutter and Dart. Skilled in REST API integration, Firebase, local databases, state management, and business application development. Built practical applications including an AI-powered structural inspection platform, a flexible POS and inventory management system, and Islamic applications. Also experienced in freelance Data Analysis, with practical skills in Python, Excel, Power BI, data cleaning, data visualization, and dashboard development.

TECHNICAL SKILLS

Mobile Development: Flutter, Dart, Cross-Platform Development, Responsive UI, UI/UX Implementation, State Management

Backend & Integration: REST APIs, API Integration, Authentication, Role-Based Authorization, Firebase

Database & Storage: PostgreSQL, Local Database, Offline Storage

Data Analysis: Python, Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Microsoft Excel, Power BI, Data Visualization, Dashboard Development, Data Reporting

Tools: Git, GitHub, VS Code, Android Studio, Postman, Figma

PROFESSIONAL EXPERIENCE

Freelance Flutter Developer & Data Analyst

Jan 2025 – Present

- Develop cross-platform mobile applications using Flutter and Dart based on project and client requirements.
- Design responsive user interfaces and implement complete application workflows and business logic.
- Integrate REST APIs, Firebase services, authentication, local databases, and offline functionality.
- Develop business applications covering POS, inventory, sales, and operational workflows.
- Perform data cleaning, preprocessing, analysis, and visualization using Python, Excel, and Power BI.
- Complete Data Analysis tasks and freelance projects through platforms including Nafezly (نفذلي) and Kafiil (كفيل).
- Create dashboards, analytical reports, and data summaries to support business decision-making.
- Translate functional requirements into practical and maintainable software solutions.

SELECTED PROJECTS

CrackDetectX — Graduation Project

Jan 2026 – Jul 2026

Flutter | AI | Computer Vision | YOLO | Deep Learning | REST API | Node.js | PostgreSQL

An integrated engineering platform for concrete structure inspection, crack detection, severity assessment, reporting, and repair-service management.

- Developed the Flutter mobile application for field inspection workflows.
- Integrated AI-based crack detection and severity classification into the inspection process.
- Applied computer vision and image analysis techniques to evaluate structural cracks.
- Connected the mobile application to backend APIs for data processing and system operations.
- Generated digital inspection reports containing analysis results and structural information.
- Implemented workflows for buildings, projects, inspections, reports, and repair services.
- Developed a marketplace workflow connecting building owners with repair companies.

Nahg El-Momen — نهج المؤمن

Jan 2025 – Mar 2025

Flutter | Dart | APIs | Audio | Offline Support | Arabic RTL

A comprehensive Islamic mobile application combining Quran, religious content, audio features, and daily religious services.

- Built the application using Flutter and Dart.
- Implemented Quran-related content and Islamic features.
- Integrated audio playback and caching for improved content accessibility.

- Implemented offline access for selected application content.
- Developed an Arabic RTL interface focused on clarity and ease of navigation.

Marhaba POS — POS مرحبا

Apr 2025 – Jun 2025

Flutter | POS | Inventory Management | Local Database | Printing

A flexible Point of Sale and business management system designed for supermarkets, retail stores, restaurants, and other inventory-based businesses.

- Developed a configurable POS system using Flutter.
- Implemented product, category, pricing, inventory, sales, and transaction management.
- Designed workflows for Admin and Cashier roles.
- Implemented shift management and daily sales operations.
- Added local database support for offline business operations.
- Integrated receipt and invoice printing functionality.
- Structured the system to support different business types and operational requirements.

Tube Top — Video Downloader

Jul 2025 – Aug 2025

Flutter | Dart | Mobile Development | Video Processing

A mobile application for downloading and managing online video content.

- Developed the application using Flutter.
- Designed the user interface and application navigation.
- Implemented video-related workflows and content management.
- Focused on usability, responsive layouts, and straightforward user interaction.

Hadith App

Sep 2025 – Oct 2025

Flutter | APIs | Arabic RTL | Islamic Content

An Islamic mobile application focused on organizing and presenting Hadith content.

- Developed the application using Flutter and Dart.
- Implemented Hadith browsing and content presentation.
- Designed an Arabic RTL interface optimized for mobile devices.
- Organized Islamic content into a clear and accessible navigation structure.

Aqsa — الأقصى

Nov 2025 – Dec 2025

Flutter | Prayer Times | Adhan | Notifications | Arabic RTL

An Islamic mobile application focused on prayer times and Adhan services.

- Developed the application using Flutter.
- Implemented prayer-time related workflows and features.
- Added Adhan and notification functionality.
- Designed a clean Arabic RTL interface with simple navigation.

EDUCATION

Beni Suef National University

Graduation Year: 2026

Faculty of Computers and Information — Department of Medical Informatics

Graduation Project: CrackDetectX

CERTIFICATIONS

National Telecommunication Institute (NTI)

Data Analysis Training

- Data Analysis
- Data Cleaning and Preprocessing
- Data Visualization
- Data Interpretation
- Analytical Techniques

TRAINING & PROFESSIONAL DEVELOPMENT

Flutter Development Training

2025

Eng. Tharwat Sami

- Completed practical Flutter and Dart training.
- Applied Flutter concepts through hands-on application development.
- Practiced UI development, state management, API integration, local storage, Firebase, and application architecture.
- Continued applying the training through independent, freelance, and academic projects.

LANGUAGES

- Arabic: Native
- English: Intermediate (B1)
